Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 9, 11-12, 19, 21-22, and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Siegel (2002/0077923).

Art Unit: 3624

Siegel discloses a method and corresponding system and computer program product for performing online product registration comprising matching a buyer and a seller of goods, receiving, at an online site, registration information from a registering user, wherein the registration information includes universal product code for an item, and responsive to identifying a matched user, notifying the user of the match, wherein the universal product code of the item in the matched user exactly matches the universal product code of the item identified by the registering user (p.1, 5-11 and p.3, 30-35); identifying a matched user comprises searching a database for a transactional match, wherein the transactional match contains complementary offer terms to offer terms of the registering user (p.1, 5-11 and p.3, 30-35); and registration information includes a description of the condition of the item (p.1, 5-11 and p.3, 30-35—brand new).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-4, 10, 13-14, 20, 23-24, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siegel in view of Dutta (US 2002/0073008). The rejection was set forth in the previous Office Action.

Claims 5-6, 8, 15-16, 18, 25-26, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siegel in view of Okumura (US 2002/0032633). The rejection was set forth in the previous Office Action.

Response to Arguments

Applicant's arguments with respect to claims 1-6, 8-16, 18-26, and 28-30 have been considered but are moot in view of the new ground(s) of rejection.
